SECTION I

TERMS & CONDITIONS AND REGULATION

This price schedule applies to all state property occupancy and services which have not been included in a multilateral agreement in which the fees have been freely negotiated, in particular, pursuant to Order No. 2017-562 of 19 April 2017 on the property of public persons.

I-1 – BASIS OF THE FEES

The occupancy starting point will be determined from the time at which the requested areas are made available to the requesting user. The occupancy will end only on the actual date of the return by the user, to the services of the GPMB, of the temporarily occupied areas. This return will be noted by a qualified staff member of the GPMB, after completion of a condition of the site assessment.

For occupancies giving rise to payment per day, the duration of the occupancy will be calculated in indivisible days, without a deduction of non-working days, the days being counted from midnight to midnight, and every fraction of a day being considered to be a whole day.

For occupancies giving rise to an annual payment, payments will be made quarterly and in advance, with non-payment 15 days after formal notice that has remained without effect, resulting automatically and without special notice, in cessation of the occupancy.

Quantities including decimals will be rounded up or down to the nearest unit.

The unit rates resulting from decisions made in regulatory texts will be modified by the implementation of the provisions of these texts when they are published.

I-2 – PAYMENT TERMS

The payment period is set at thirty (30) days from the invoice issuance date.

The amounts due are preferably paid by bank transfer to the public accountant's bank account, or otherwise by cheque made out to 'Agent comptable du GPMB' (GPMB accounting officer).

Depending on the circumstances, the GPMB may require a deposit prior to issuance of the permit or performance of the service.

In addition, the GPMB may refuse any service described in this document, to users who have not have settled a final notice of payment before legal proceedings. This refusal may be enforced until payment in full of the outstanding amount, regardless of the legal situation of the users in question.

Late payments will automatically, without a reminder, result in the invoicing of late payment penalties consisting of the set penalty and default interest. The set penalty for recovery costs provided for in Articles 39 and 40 of the Act of 28 January 2013 is €40. The default interest rate is equal to the interest rate applied by the European Central Bank to its most recent main refinancing operations (the official REFI rate applicable on the day following the debt due date) plus eight (8) percentage points.

Non-payment of the fees within the payment periods will automatically result in the issuance of formal notice. If payment is not made within 15 days, this may result in cancellation of the occupancy and the GPMB may order, at the expense and risk of the occupier without a permit, the removal of his installations, equipment and goods.

I-3– INSURANCE AND CIVIL LIABILITY

Users must be have a civil liability insurance policy covering, insofar as it concerns them, the use of property (machinery, equipment, etc.) belonging to GPMB, the civil liability they may incur in relation to

GPMB and in any capacity in relation to third parties. The user may, if he judges it useful, purchase insurance covering the property of which he is the owner, holder or keeper (fire, theft, etc.).

The user will keep a copy of the insurance certificate available to the GPMB and must inform the GPMB of any accident that has occurred during provision of the goods (machinery, equipment, etc.) belonging to the GPMB, regardless of the gravity of the accident and the person responsible for it.

By requesting the provision of an area of land or a covered area, the user retains custody of the goods and equipment stored there and completely releases GPMB from all liability regarding damage or losses which could occur to these goods. Under the same conditions, the user accepts liability for damage of any kind which could occur to the premises because of their use.

The user must purchase insurance covering him against third-party actions, including actions by neighbours, in the event of a loss event, originating on the premises of GPMB that he is occupying or using. The user may, in addition, if he considers it useful, purchase insurance covering the goods and his own property.

He waives and must obtain from his insurers the waiver of any remedy against the GPMB and its insurers for any damage or loss that may arise from the goods of which he is the owner, holder or keeper.

Under these conditions, GPMB and its insurers waive acting against the occupier and his insurers in the event of a fire, water damage or an explosion, originating on the rented premises.

I-4 – PORT SECURITY AND SAFETY (TRAFFIC, FALLING INTO THE WATER, ETC.)

I-4.1 – PORT SECURITY

Any person on the port facility must have an access permit.

This is issued for operating or maintenance needs or any professional activity deemed useful by the operator.

It is necessary and may be cancelled by the authority which issued it. It is in the form of an access card (badge or traffic pass).

The general provisions for distribution and use of badges, data confidentiality and prices are available on the GPMB website (www.bordeaux-port.fr).

I-4.2 – PORT SAFETY

I-5.2.1 – TRAFFIC

Traffic on the terminal can be very intense (cars, trucks, trains, handling machinery, etc.). The Highway Code, and in particular its rules of priority, apply to the traffic lanes recognisable by the presence of road signs and ground marking.

On the wharves and docksides, handling machinery has priority. Vehicles must access these areas at walking speed.

Pre-storage of trailers is not allowed within the port area.

I-5.2.2– HANDLING AND OPERATIONAL AREAS

Access to handling and operational areas is subject to prior permission from the handler or the client.

Each intervening party undertakes to comply with the guidelines applicable in the area in question.

Specific instructions appropriate for the product being handled or the nature of the work are displayed at the edge of the area.

I-5.2.3 – FALLING INTO THE WATER

A position fewer than 1.50 metres from the edge of the wharf exposes the intervening party in question to a risk of falling into the water. This unsafe area is demarcated on the Bassens and Verdon terminals by a red line painted on the ground.

In order to avoid this risk as much as possible, users must:

- 1- Minimise operations on the wharf edge;
- 2- Plan collective protection measures for work sites (sealed barriers, self-standing barriers, nets, etc.);
- 3- If an anchor point can be made, use a fall arrest harness;
- 4- Wear a lifejacket (buoyancy >100 N), keep a lifeline to hand with a throw line of at least 30 m and never remain alone.

I-5 – IMAGES

By default, the user permits photographs, including by air or satellite, of his equipment occupying the facilities of the GPMB and the use of such shots for the purpose of promoting the activities of the GPMB.

SECTION II

PORT AREA

PREAMBLE

The sheds and docksides directly accessible from the wharf are considered to be in the port area. The port area is exclusively reserved for activities creating maritime traffic, to which the prices set out in the table below will be applied.

A period of 7 calendar days free-of-charge is granted for pre-storage of sundry and bulk goods in the port area before the arrival or departure of the vessel. The free-of-charge period applies to goods out of crane reach.

II-1 – ORDINARY OCCUPANCIES

Occupancies of GPMB docksides and covered areas are permitted according to the requests presented by users, in accordance with the arrangements and terms decided for this purpose by the GPMB Governing Board.

These occupancies give rise to the collection, to the benefit of GPMB, of a fee calculated according to the area occupied or, in certain cases, according to the tonnage of the goods.

Whether it involves docksides or covered areas, the deposit and removal of goods must always be carried out in a way which ensures that the goods are grouped together as far as possible and the surface whose occupancy has been permitted is used to best effect.

For deposits on docksides or in sheds, the surface area to be taken into account for calculation of the fee shall be that limited by the outside perimeter of the entire deposit, with no reduction for the free spaces required for moving and handling.

If these deposits result in the surrounding areas being unavailable to other users, these areas will also be taken into account.

II-2 – PRIVATE ALLOCATION

On request of the interested parties, the GPMB's Managing Director may allow private allocations of docksides or covered areas under the temporary occupancy regime of state property.

In principle, in order to request these private allocations are granted, the interested parties must provide evidence of sufficiently regular maritime or waterway traffic of a significant size in relation to the areas whose private allocation they are requesting. Should, during the occupancy, there be insufficient maritime and waterway traffic, GPMB will impose a penalty on the user for lack of traffic.

The individual decisions ordering these private allocations will define their duration and their special accompanying conditions, in the interest of the operation of GPMB. The private allocations will give rise to the collection by GPMB of a fee under the conditions laid down in the occupancy permit. This will be paid in advance per non-divisible year, half-year or quarter, with any period started being due. They may be required to make a traffic or activity commitment.

The user must make the allocated areas again available to the GPMB in accordance with the conditions set out in the occupancy permit as soon as he no longer needs them for the traffic for which the allocation was granted.

If these allocations result in the surrounding areas being unavailable to other users, these areas will also be included as being occupied.

Should the state property be occupied with no entitlement or permit, duly noted by a sworn employee of the GPMB, this occupancy will be invoiced, in arrears, increased by 100% of the public price.

II-3 – OCCUPANCY CONDITIONS

A user using the storage means and premises of the GPMB must install appropriate fire-fighting equipment and maintain it in good working order. On the GPMB's request, the user must provide documents certifying compliance of the equipment with the standards in force. Checks may be made, either by the GPMB, or by an approved organisation that it has commissioned, at the user's expense and risk. In the event of non-compliance, the user must carry out the required work within the time limit set by the GPMB. Failing this, the occupancy may be cancelled, by operation of the law.

The user must comply with all of GPMB's instructions and, in particular, all the recommendations issued by his insurers. Braseros, barbecues, fires and other heat sources unrelated to the users' activity are forbidden within the various enclosures of the GPMB.

II-3.1 - A user permitted to occupy a dockside or shed may not transfer to third parties the use of all or part of the locations made available to him. However, a dockside or shed may be allocated to several users. Having heard the users, this division will be made known to the parties concerned by the GPMB.

II-3.2 - The user occupying a dockside or a covered area must, on expiry of his occupancy and each time required to do so by the GPMB's services, acting in the general interest, return it in clean and good condition and restore it in the event of pollution. Should the cleaning or rehabilitation work not be carried out, or poorly carried out, the occupancy fee will continue to run until the time that the qualified employees of the GPMB have acknowledged that these locations have been returned in a perfectly clean or cleaned-up condition. Depending on operational needs, GPMB reserves the right, should the occupier of a dockside or a shed not carry out the cleaning, restoration or decontamination work, to have it automatically carried out at the expense and risk of the user concerned.

II-3.3 - Goods may not be leaned against the walls of buildings. All damage or degradation to sheds, to their ancillary equipment or to docksides, noted during or on expiry of the occupancy will be repaired by the GPMB, at the expense of the user benefiting from the occupancy; the user will be responsible, as the case may be, for seeking remedy against the responsible third parties, but in no case may this exempt the user from paying the amounts claimed by the GPMB.

In order to avoid any challenge, the user requesting occupancy must, on the day that the areas to be occupied are handed over to him, have the qualified employees of the GPMB record any existing damage or degradation. Failing any reservation in this regard, no claim will subsequently be admissible, and all damage or degradation noted will be borne by the occupier. Condition of the property assessments will be carried out in the presence of both parties.

In all cases, all damage or degradation that occurs during the occupancy, must be immediately reported by the user to the GPMB.

II-3.4 - The user must tolerate, without being able to make any claims, and without this resulting in a reduction in occupancy fees, schedule postponements or inconvenience resulting from repairs or modifications made by the GPMB and/or companies acting on its behalf. No changes may be made by the user to the docksides, sheds, etc., covering the area occupied by him unless he has previously received written permission from the GPMB.

II-3.5 - The user must comply, for the occupancy of docksides and covered areas made available to him, with the regulations in force and all regulations of the GPMB and, in particular, with the regulations relating to handling, storage and security of hazardous materials in seaports.

It is also recalled that storage on docksides near sheds of various combustible loads (in particular

packaging and pallets) will be prosecuted as a public domain offence.

The user must comply strictly with the general and specific laws or regulations governing the activity carried out (the law on classified establishments in particular). He must keep informed of draft laws or regulations planned at the national, European and/or international levels.

The user must take the necessary protective measures to order to confine the goods stored on the area occupied by him (brackets, concrete barriers, etc.).

II-3.6 - Parking of port handling machinery is prohibited inside sheds used for the storage of goods. The storage of the fuels and lubricants necessary for the operation of these machines is also prohibited inside sheds and may only be permitted on the parts of the docksides designated by the port authority.

II-3.7 - Users are reminded that, pursuant to Article L.231-1 of the General Code of Property of Public Persons, disputes which could arise, both in respect of the occupancy of docksides and that of sheds, shall be referred in the first instance to the administrative court of Bordeaux.

II-3.8 - The supply of drinking water to users will be made by the concession holder of the public service delegation issued by the GPMB, under the financial conditions determined by it.

II-4 – SPECIAL CONDITIONS FOR APPLICATION OF THE PRICES

The prices for occupancy of sheds and docksides apply only to goods undergoing sea or waterway transit.

However, the storage of goods that are not undergoing sea or waterway transit or connected with life-cycle services of vessels may be permitted, but only in the 2nd zone (no direct access to the wharf). In this case, the applicable price will be negotiated.

II-5 – INCREASE IN THE FEE IN THE EVENT OF EXTENDED STORAGE OF GOODS ON THE GPMB'S PREMISES

The provisions of Article L 5335-3 of Book III of the Transport Code are applicable in their entirety.

Goods arriving or leaving by sea, loaded or unloaded in the GPMB may be parked either as part of the application of the free-of-charge period as provided for in the preamble to this document or as part of the issuance of a temporary occupancy permit.

At the end of the period, either because the free-of-charge period has been exceeded or because of occupancy without a permit, the occupier shall be liable for ***the fee corresponding to his use, increased by 100%***.

II-6 – USE OF BERTHS, UNLOADING AND STORAGE AREAS OF THE BASSENS TERMINAL

II-6.1 – UNLOADING AND STORAGE

- Unloading area

The unloading area which extends over a depth of approximately 15 m is reserved for handling operations and must not, under any circumstances, remain occupied after departure of the vessel.

The GPMB may, at the handler's expense and risk, have any goods that remain stored after departure of the vessel removed, without prejudice to the pricing measures provided for in this Regulation.

The handler must ensure during loading or unloading operations that the facilities in the area (networks, rail tracks, etc.) do not get damaged.

- Storage areas

The docksides between the rear rail tracks and the R.D. 10 will be reserved for storage.

They will be made available to companies by the issuance of an occupancy permit or the benefit of an availability as part of the application of this price schedule.

II-6.2 – CLEANING

On the unloading areas, as defined above, cleaning will be performed by the GPMB.

In the storage areas, cleaning will be performed by the occupancy permit holder or beneficiary, as defined in the above paragraph, or otherwise by the handler under whose responsibility the area in question will be taken over, except for the service aisles that will be GPMB's responsibility (cf. ANNEX 1).

If this is not done, the GPMB will carry it out at the expense and risk of the occupancy permit holder, or failing that, the handler responsible for the take-over operations.

SECTION III

OUTSIDE THE PORT AREA

The state property managed by the GPMB may, when the situation of the premises allows, be made available to third parties under the temporary occupancy regime.

III-1 – FEES

The temporary occupancy permits (AOT) give rise to the payment of state property fees based on following price schedule listed exclusive of VAT.

III-1.1 – SPECIFIC INVOICING BASES

State property occupiers whose fees are calculated on the basis of the volume of their activities (the case of price codes 1000-1001-1002-1023-1030-1031-1036-1037-1301 to 1305 inclusive) must communicate to the GPMB the statement (monthly or annual, as the case may be) of the volumes or tonnages actually unloaded, transited or collected by their facilities during the reference period.

SECTION IV

SPECIFIC FEES

This section applies to specific fees which may be used as a basis of or incorporated into occupancy permits, both agreements and authorisations.

IV-1 – FEES

The corresponding permits give rise to the payment of fees based on the following price schedule listed exclusive of VAT.

IV-2 – SPECIFIC INVOICING BASES

State property occupiers whose fees are calculated on the basis of the volume of their activities (the case of price codes 1000-1001-1002-1023-1030-1031-1036-1037-1301 to 1305 inclusive) must communicate to the GPMB the statement (monthly or annual, as the case may be) of the volumes or tonnages actually unloaded, transited or collected by their facilities during the reference period.

IV-3 – BASES PARTICULIERES DE FACTURATION

Les occupants du domaine public dont les redevances sont calculées en fonction du volume de leurs activités (cas des tarifs 1000-1001-1002-1023-1030-1031-1036-1037-1301 à 1305 inclus), sont tenus de faire parvenir au GPMB le relevé (mensuel ou annuel, selon le cas) des volumes ou tonnages effectivement déchargés, transités ou prélevés par leurs installations pendant la période de référence.

IV-4 - PRICING SPECIFIC TO UTILITIES

IV-4.1/ Buried utilities:

R = TF + (Tb x L x Cspé) + Tsf (as applicable), where:

- R corresponds to the annual fee, excluding VAT, payable to the GPMB;
- TF (fixed term) = €500/year excl. VAT;
- Tb (base rate) = Either $Tb_{\geq 500 \text{ mm}} = €3/\text{lm}/\text{year}$ excl. VAT, or $Tb_{\leq 500 \text{ mm}} = €2/\text{lm}/\text{year}$ excl. VAT;
- L = length of pipe or network in linear metres (lm);
- Cspé = 1 within Bordeaux Métropole or 0.75 outside;
- Tsf (Under-river crossing inclusive price) = €1000/year excl. VAT;

IV-4.2/ Public water supply and sewerage pipes and related infrastructure:

R = TF + (Re x E) + (Tb x L) + Tsf (as applicable), where:

- R corresponds to the annual fee, excluding VAT, payable to the GPMB;
- TF (fixed term) = €500;
- Re (fee for area occupied by the associated infrastructure) = €3/m²/year excl. VAT;
- E (area occupied by associated infrastructure) in m²;
- Tb (base rate) = €0.05/ml/year excl. VAT;
- L = length of pipe in linear metres (lm);
- Tsf (Under-river crossing inclusive price) = €1000/year excl. VAT.

IV-4.3/ Overhead utilities:

IV-4.3.1/ Electricity:

R = TF + (Tbea x L), where:

- R corresponds to the annual fee, excluding VAT, payable to the GPMB;
- TF (fixed term) = €500;
- Tb (overhead electricity base rate) = €0.5/lm/year excl. VAT;
- L = length of cable in linear metres (lm).

IV-4.3.2/ Telecommunications:

R = TF + (Tbta x L), where:

- R corresponds to the annual fee, excluding VAT, payable to the GPMB;
- TF (fixed term) = €500;
- Tbta (overhead telecommunications base rate) = €1.50/lm/year excl. VAT;
- L = length of pipe in linear metres (lm).

IV-4.3.3/ Utility rooms, electrical cabinets or small installations, terminals, utility poles and transmission towers

R = TF + (Tblai x S) + (Tbb x Nbb) + (Tbp x Nbp) + (Tbpy x Nbpy), where:

- R corresponds to the annual fee, excluding VAT, payable to the GPMB;
- TF (fixed term) = €500;
- Tblai (base rate for utility rooms, electrical cabinets and small installations) = €30/m²/year excl. VAT;
- S: space occupied by utility rooms, electrical cabinets and small installations (m²);
- Tb (base rate for terminals) = €5/unit/year excl. VAT;
- Nbb: Number of terminals;
- Tbp (base rate for poles) = €50/unit/year excl. VAT;
- Nbp: Number of poles;
- Tbpy (base rate for towers) = €300/unit/year excl. VAT;
- Nbpy: Number of towers;

IV-4.4/ Mobile telecommunications:

The antennas and their supports are invoiced at a flat rate of €15000/unit/year excl. VAT.

IV-4.5/ Optical fibre:

R = TF + (RL x La) + (Rlt x Sp) + (Tsf x T) (as applicable), where:

- R corresponds to the annual fee, excluding VAT, payable to the GPMB;
- TF (fixed term) = €500;
- RL (flat fee for 4 cables) = €1500/km/year excl. VAT;
(€400/km/year excl. VAT per additional cable)
- La (length of the line) in km;
- Rlt (fee for utility rooms) = €30/m²/year excl. VAT;
- Sp: surface area of the utility rooms (in m²);

If under-river crossing

- Tsf (Under-river crossing inclusive price) = €1000/year excl. VAT;
- T (number of under-river crossings).

SECTION V

ADDITIONAL SERVICES

V-1 – POWER SUPPLIED BY THE GPMB

In the absence of access to the public power network, occupiers who so request it will benefit from the following service:

The GPMB will provide power as far as it is able, taking into account the availability of the sector, operational needs and the condition of its installations.

The user must make a request setting out his precise needs and take all necessary and useful measures in his installation, to avoid damage and accidents that could occur to persons and property.

The user will be responsible for and will bear in full the burden of damage or accidents that could be caused directly or indirectly by his installations. For the sole purpose of guaranteeing its own installations, the GPMB may have the user's installations checked, without the latter however being discharged from his above-mentioned responsibility. Under no circumstances will the GPMB incur liability because of defects in these installations which would not be under its control.

Power will be provided only if this installation complies with the standards and regulations in force on the day of the request. The user will be required to communicate the documents certifying this conformity at the GPMB's request.

Power supply by means of power sockets on machinery (440 V):

The electricity is delivered to the switch output on the crane gantry and the user's installation begins at this point.

The power-on or power-off times are necessarily the start or end times of each half-day of normal day work at the GPMB. Work outside normal hours (8:00-12:00/14:00-18:00 Monday to Wednesday, 17:00 on Thursdays and Fridays) may be requested by the user. He will then be charged for the provision of staff for these periods.

V-2 – PRICING OF NON-TRANSFORMED POWER PROVIDED IN THE PORT AREA

Power prices as at 01/01/2021:

The prices below are broken down as follows and may change according to the market at any time:

- 1- Fixed amount (invoiced monthly): 1.083 cents €/kw (or kva) of subscribed power (this amount includes the fixed connection charge plus the special routing tax (CTA)).
- 2- Flat rate per kilowatt/hour supplied:
 - Winter time (November-March): 16.26 cents €/kw/h
 - Summer time (April-October): 7.96 cents €/kw/h

These flat rates (summer/winter time) include the supplier's cost per kilowatt/hour, as well as the transmission cost per kilowatt/hour, plus the electricity tax (CSPE), levied by the State.

V-2.1 - POWER TOOLS ON THE WHARF

A kwh fee is applied to electric tools covering the depreciation of GPMB installations, their maintenance and electricity consumption.

The calculation formula is as follows: $P (\text{€/kwh}) = K \times C = \text{€ } 0.2678$

where

$K = 2.6$ corresponding to the coefficient covering the depreciation and maintenance of GPMB installations

C = € 0.103 corresponding to the average kwh price purchased by the GPMB.

In the context of the liberalisation of the energy market, these prices may change over the course of the year.

V-3 – ANCILLARY SERVICES

V-3.1 - PROVISION OF A GANGWAY

V-3.1.1 – FOR THE STOPOVER OF A CRUISE SHIP OR NAVAL VESSEL

The vessel has the safekeeping of the gangway and assumes full responsibility for it from when it is installed until it starts to be removed, both with respect to third parties and the GPMB. Any claim submitted for damage within this period shall be the vessel's responsibility.

The requesting party is responsible for ensuring that the gangway is appropriate for the use it makes of it. The GPMB cannot guarantee compliance with operating standards or conditions known only by the requesting party.

The prices below include installation or removal, as well as the equipment and personnel required for use not exceeding 6 days. For longer periods, the daily rental price of the gangway is € 27.00/day.

SUPPLY and REMOVAL:

LOCATION	BORDEAUX		BASSENS		PAUILLAC		LE VERDON
	6 h-22 h	22 h-6 h	6 h-22 h	22 h-6 h	6 h-22 h	22 h-6 h	
Monday to Friday	1 118 €	2 100 €	1 118 €	2 100 €	1 224 €	2 205 €	Request a quote
Saturday, Sunday and public holidays	2 180 €	2 180 €	2 180 €	2 180 €	2 286 €	2 286	

The above gangway fee will be reduced by 10% if requested by a cruise ship from a company which has a ship that has already docked at the GPMB since the beginning of the year.

Order conditions (must be by fax): include the following minimum information on the order:

- Vessel name
- Place of docking
- Berth number
- Desired gangway dimensions
- Date and time of gangway installation
- Date and time of gangway removal
- Any other particular constraint:
 - * weekday: order before 12:00 for any operation on the next day as of 5:00.
 - * for an operation on the same day as of 20:00: order before 10:00
 - * for Saturday and Sunday as of 5:00: order before Friday 12:00.
 - * for public holidays as of 5:00: order the previous working day before 12:00.

Order cancellation:

For an order cancellation made under the same time conditions as for the order, no cancellation fees

If the order cancellation is later than the order conditions, the transaction is invoiced as if it had been performed (except in the particular quote case).

V-3.1.2 - ACCESS GANGWAY AT THE RO-RO BERTH FOR AN AXIAL-RAMP VESSEL AT BASSENS

Requires a special quote and agreement

V-3.2– PROVISION OF A PUMP AT BASSENS

At Bassens upstream, provision of a pump with nominal flow of 1000 m³/h for the treatment of hazardous goods at berth 415:

- per vessel, borne by the consignee€ 1,880/stopover

At Bassens downstream, provision of a pump with nominal flow of 360 m³/h under pressure of 8 bars for the treatment of bulk liquids at berth 436:

- per vessel, borne by the consignee€ 5,139/stopover

Note: The GPMB does not provide safety officers and service personnel who remain the vessel's responsibility. Operation of the pump is subject to a specific procedure which is given to the user, by the services of the GPMB, when placing the order.

V-3.3 – PORT RAILWAY FEES (VFP) (SEE ANNEX 3)

On 1 January 2021, the Port of Bordeaux's Port Rail Network (RFP) was extended to include the Bec d'Ambès railway line.

In order to promote the development of railway transport and to adopt a sustainable development approach, the GPMB has set the following prices for 2021:

Access to the port terminals of Bassens and Le Verdon

- Access fee (excluding fuelling and parking) for commercial traffic (loading and unloading on docksides) for **maritime transshipment**:
Free of charge;
- Access fee (excluding fuelling and parking) for commercial traffic (loading and unloading on docksides) for **non-maritime purposes**: **€200 per train excl. VAT;**

The conditions for applying prices that are no longer applicable, following changes to the Prices Regulations and Occupancy document of previous years, but which it is necessary to keep only for the currently valid permits which refer to them are set out below and summarised in SECTION 5 – PRICE TABLES.

Multiplier coefficients

This article no longer applies from 1 January 2020. It is retained in this document, only for the currently valid permits which refer to it.

In order to take account of the conditions specific to each occupancy, the annual rates used as the basis for the fees may have the following multiplier coefficients applied:

a) K1 coefficient taking into account the nature of the occupier's activities or the use that is made of the facilities

This coefficient can take the following value:

K1 =	for
0.80	occupancies related to port activity or occupancy located in the secondary area in relation to the roads open to general traffic
0.10	large area occupancies of which a large part is used as a parking area reserved by the occupier for internal use
0.67	large area occupancies of which a large part is reserved for customer parking

b) K2 coefficient taking into account the duration of the occupancy

Where the duration of a permit is not equal to the basic duration taken into account in the reference taxation unit, the fee amount is prorated. However, the minimum basis then taken into account will be:

- the month if the taxation unit is the year
- the day if the taxation unit is the month.

However, this measure is not applicable to inclusive-price fees or those based on a subscription principle.

c) K3 coefficient (0.70) that may be assigned to occupancies by charitable organisations or social-purpose associations

This coefficient can be applied to land or buildings that are disused and for occupancy permits limited to a duration of 5 years.

List of prices not applied as of 1 January 2019 and *1 January 2021 but retained only for the currently valid permits which refer to it.
